

# Healthcare Receivables Solution

## Streamline revenue cycle management to increase revenue and productivity.

Timely, efficient receivables management can have a significant impact on your healthcare organization's long-term financial sustainability. BBVA's Healthcare Receivables Solution (HCRS) helps you shorten the healthcare revenue cycle by consolidating your paper Explanation of Benefits (EOB), electronic remittance advices, and payment information into a simple, automated workflow. It eliminates manual data entry, allowing you to post and balance healthcare payments faster and more accurately to improve overall cash flow. Denials are more easily managed as well, helping you increase revenue by reducing the number of denied claims.

Comprehensive, automated multi-payment channel reconciliation reporting capabilities provide a 360-degree view of reconciliation statuses across the continuum of payments channels including Electronic Bill Presentment and Payment (EBPP), e-Lockbox, medical lockbox, cash, card, and ACH.

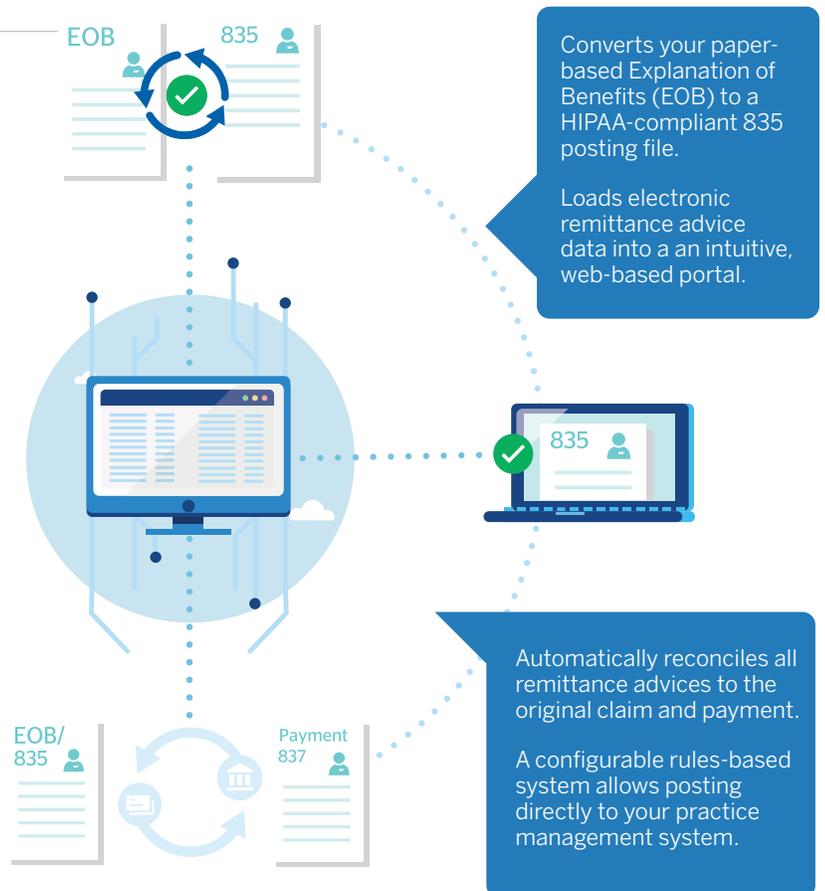

## How it benefits your business

- Accelerate cash flow by shortening payment match cycles
- Increase revenue by managing denials more effectively
- Improve efficiency and maximize profitability by converting paper EOBs to electronic files
- Streamline accounting functions and accelerate revenue recognition with comprehensive multi-payment channel reconciliation reporting

## Simplify your revenue cycle workflow A comprehensive solution specifically designed to meet the needs of today's healthcare providers.

HCRS streamlines the capture of EOB and remittance data, then re-associates the payment to the remittance for automatic posting to your practice management system. The secure, online solution meets all HIPAA requirements and provides a searchable online portal of transaction details and related claim, remittance, and correspondence information.

Healthcare Receivables lets you streamline your revenue cycle management processes to reduce costs and shorten AR days, without compromising quality of care, all while increasing posting accuracy and eliminating the time and expense of manual data keying.
